

Keep on Sailing

Prior to the merger of NYK-Hinode Line with NYK Global Bulk, NYK-Hinode Line was operating a multi-purpose fleet that could meet all types of transport requirements, including heavy cargoes and project cargoes. NYK Global Bulk Corporation was shipping various bulk cargoes and was recognized as one of the world's largest specialists in handy bulk carriers.

The merger has allowed us to leverage the strengths of both companies to provide our customers with top-level services that meet all kinds of transport needs.

We target the creation of new enterprise value. We also desire to expand and develop new business activities, and pursue further efficiencies and profitability by achieving those targets.

Needless to say, safe navigation and protection of the marine environment are essential elements of the ocean shipping industry. We are therefore proud to have ISO9001, ISO14001, and OHSAS18001 certification, which ensure that we have established procedures for safe navigation and protection of our environment. We will promote continual improvement and take proactive approaches to further our environmental activities.

Meeting All Kinds of Transport Needs

NYK Bulk & Projects Carriers Ltd. was established on October 1, 2013, as the product of a merger between NYK-Hinode Line Ltd. and NYK Global Bulk Corporation.

NYK-Hinode Line Ltd. was one of the pioneers of heavy lift carriers, and NYK Global Bulk Corporation has played a significant role in the industry as one of the world's largest specialists in handy bulk carriers.

We now provide our customers with first-rate services around the world by leveraging both companies' advanced maritime know-how, technology, and experience. We competitively operate various types of vessels to expand and develop services of all kinds to meet and exceed our customers' needs and market demands

Bulk Cargo

We operate various types of vessels, from those having a deadweight capacity of 9,000 tons to vessels reaching 60,000 tons. On these ships, we move various kinds of bulk cargoes, i.e. coal, copper concentrate, nickel, salt, cement, grain, fertilizer, logs, forest products, cokes, manganese chromium steel, steel products, etc. We are also proactively developing bulk cargo transport in the off-shore trade.

**DYNAMIC

Semi Liner Services

We offer regular semi-liner services to areas all over the world, including Europe, the Mediterranean Sea, Africa, North America, Central America, South America, South East Asia, Oceania, India, the Middle East, and the South Pacific. We continuously strive for safe, accurate, and reliable services by making use of our advanced maritime know-how.

Module & Project Cargoes

We handle heavy and lengthy project cargoes, such as that for LNG facilities, power plants, and oil refineries. We coordinate closely with our customers to produce transport scenarios from pre-loading planning to delivery.
